Help create a FAIR research data landscape. Discover new tools and techniques and aggregate your services to the EOSC Portal! [EOSC-hub](#), [FREYA](#) and [SSHOC](#) are joining forces in shaping the EOSC. The "[Realising the European Open Science Cloud](#)" event invites social science and humanities researchers, data experts, research funders, policy makers, and representatives from research infrastructures, service providers, research libraries and archives, the EOSC Ecosystem, and ESFRI Cluster projects to join our online event and find out what we have to offer and how to get involved.

The main objectives of our four-day program are to:

- Showcase the results achieved to date in each of our projects
- Teach you to use the new tools and techniques we've developed to improve your data FAIRness and prepare your data and services to be aggregated into the EOSC Portal
- Identify and onboard new members to our project communities
- Foster citizen science and collaborations with industry

Through interactive sessions, expert panels, live demonstrations, and discussions we'll cover:

- Data policy and governance
- Technology and infrastructure
- Training and community building
- Sustainability management

[FAIRsFAIR will be at the event with a virtual exhibition booth where attendees can gather more detailed info about how FAIRsFAIR is fostering FAIR data practices in Europe](#)
