Date:
09 December 2020
Location:
Virtual

FAIRsFAIR is organising a workshop **on 9 December** to demonstrate the implementation of a DCAT-based FAIRdata Point that enhances FAIRness in the exposure of metadata in repositories.

The event is for the benefit of the tester and developer repositories already working with us, and will also be of interest to other repositories looking to expose their metadata using the methodology to be demonstrated.

After the demonstration, FAIRsFAIR experts will open the floor to the participating repositories to gauge their response and discuss alternative approaches. An outlook on FAIRsFAIR plans for 2021 will also be presented.

Draft Agenda

- 15:00 - 15:15 Welcome
- 15:15 - 15:45 Insight into the reference implementation - what does it do and not do?
- 15:45 - 16:00 Break
- 16:00 - 16:30 Current DCAT metadata model in the reference implementation
- 16:30 - 16:45 Missing aspects - Mentimeter & discussion
- 16:45 - 17:00 Break
- 17:00 - 17:20 Complementary approaches
- 17:20 - 17:30 Questions
- 17:30 - 17:45 FAIRsFAIR plans for 2021
- 17:45 - 18:00 Wrap up
