

Competence Centre

The FAIRSF AIR Competence Centre is a nexus between the FAIRSF AIR project and research communities. We aim at creating a space where communities bring together their best practices from a range of domains, making the Competence Centre a focal point of reference concerning FAIR data.

As a shared hub of expertise, FAIRSF AIR Competence Centre role is structured around 3 key points:

- **Advisory:** networking space to enable stakeholder collaborations and routing people to expertise in thematic areas.
- **Harmonisation:** to consistently describe resources relating to FAIR data stewardship; provide leadership in harmonisation of policies, tools and resource.
- **Dissemination:** dissemination of training material and courses; enable sharing of best practices.

FAIRSF AIR knowledge base

A self-service library that stores a collection of reusable training materials, guidance resources, publications and other tools to help data stewards, policy makers and researchers make and keep data FAIR.

- **Training Library:** a collection of reusable training materials, guidance resources, publications and other tools to help data stewards, policy makers and researchers make and keep data FAIR
- **FAIR Data Forum:** an open space for users (individuals, institutions, organisations) to post queries, answers, comments pertaining to making data FAIR
- **Publications:** a space where to find articles and publications, (not only) about training
- **Training activities.** They include practical, powerful training interventions for the data science community in Europe; mapping data science programmes at universities; and integrating FAIR data skills into existing training offerings.
- **Terms4FAIRskills Training Materials Browser:** a proof-of concept training materials browser has been developed for use with the [terms4FAIRskills terminology](#). The documentation is openly available online [here](#) (github repository) and [here](#) (API). Read the [blog post](#) to find out more.
