

Date:  
 15 February 2022  
 Location:  
 Virtual

In the context of the FAIRsFAIR project, the University of Minho, the European University Association (EUA), the University of Göttingen and the University of Amsterdam are organising an online workshop on “Supporting the uptake of FAIR data teaching and training: tools and reflections from the FAIRsFAIR project”, taking place on 15 February 2022 at 14:30-16:00 CET.

During the event, the project will present to and discuss with the higher education community the main findings and outputs produced within its efforts to support the uptake of FAIR data-related content and skills in university programmes at the bachelor, master and doctoral levels. These include:

- The [FAIR Competence Framework for Higher Education](#), defining competence groups in five areas related to Data Science and Data Stewardship,
- The adoption handbook “[How to be FAIR with your data: a teaching and training handbook for higher education institutions](#)”, providing competence profiles, learning outcomes, lesson plans as well as information on course design,
- The report “[Good practices in FAIR Competence Education](#)”, highlighting seven successful use cases of training addressing FAIR in the higher education context

The workshop will be of interest to academic leaders, practitioners involved in RDM training at the doctoral level and other professionals responsible for higher education programmes.
